

# Field – Technical Specs Sheet

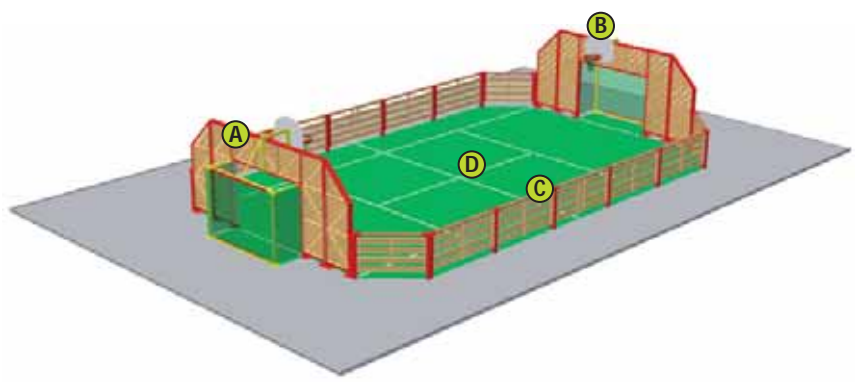

## Classic Junior

### Field equipment

It consists of sportswalls, side fences under 1m high (in compliance with standards in effect) made of deep-treated northern timber, posts, corner posts and joint covers made of thermo-lacquered aluminium, and sports equipment (goals, boards, posts).

The sportswalls include aluminium posts and deep-treated northern-timber panels 2.40m high with a 45° return. Goal size is 2.4m x 1.6m, with a 3.96m x 1.6m net. The goal is topped by a 2.25m-high basketball assembly. Concepts are painted red (aluminium parts) and yellow (galvanised steel parts). With sand-filled 21mm artificial turf (23 kilos per sq. m.) including aluminium borders and line markings.

- A** Sportswall
- B** Basketball assembly set to a height of 2.25m
- C** Side fence under 1m high
- D** Sand-filled artificial turf with multi-sports line markings

## Materials and manufacture

**Classic Junior AB** : (Aluminium-Wood) Northern timber – autoclave-treated for a **10-year warranty** - Aluminium 6060 T6 type, Afnor A 50-411, 50-451 and NF A02-104 standards. **Lifelong anti-corrosion** – QUALICOAT label Thermo-lacquering painting with a **10-year warranty** (customisable colours on option) – Basketball boards and hoops. Resistant up to a **480-kilo load** – Sand-filled artificial turf with a **5-year warranty** – harmless sand, 22 kilos per sq. m., **approved by the sports grounds laboratory**. – 3mm Ø polyethylene nets (5mm Ø steel core reinforced nets on option) – Nets fastened by AGOFIX system (**tested at over 25,000 frictions at a 150-to-400-kilo load**), an AGORASPACE® patent. Stainless steel fastening and bolting – Vandal-proof stoppers – Vibration dampers with a **10-year warranty**.

AGORASPACE® is certified ISO 9001 - 2008 throughout the entire process (design, manufacture, sales, installation, maintenance, and the organisation of a national competition)

# Classic Junior AB – Standard configurations

MODEL	FIELD SIZE
AE JUNIOR 8x17	7,86m x 17,54m
AE JUNIOR 10x20	10,14m x 20,70m
Customised size on option	

## Installing an AGORESPACE

A Classic Junior® is installed in 6 phases:

**Platform:** Marking out the site, paving the platform, Preparing the base, preparing the foundations for the sportswall and dividing up the longitudinal beam for the side fences. Supplying the material: Unloading all of the material needed for the Agorespace on site. **Concept assembly:** assembling and setting up the basketball goal, then the sportswall, and the side fences. **Laying the turf:** Unrolling, cutting and integrating the turf, and gluing the line markings. **Sand fill:** Sharing out the sand-bags, then spreading out and sweeping the sand into the turf. **Finishes:** tarring the concrete foundations, laying the aluminium borders to finish the turf, fastening the nets on goals and basketball hoops.

## AGORESPACE "BEFORE-DURING-AFTER" services

In order to involve the young people and inhabitants of the village, Agorespace offers support measures to the municipalities:

**1. A public briefing:** Prior to the installation, an Agorespace team member will organise a meeting where elected officials, partner associations, village or neighbourhood residents, parents and young users will be attending. **2. The handing over of the keys:** Once the installation is completed, Agorespace will throw a party for the inauguration, organising events and sports meets to help the young people discover the various options that are open.
