

Junior Modules – Technical Specs Sheet

Junior Handball Basketgoal

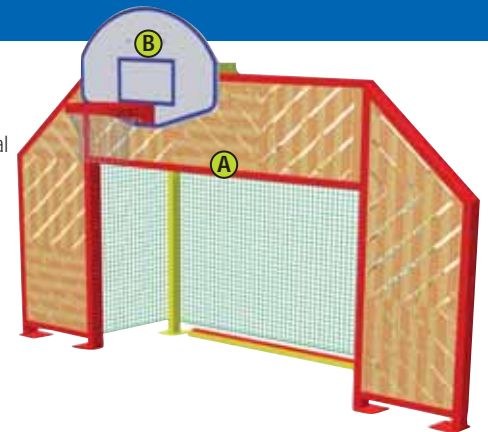

Junior Handball Basketgoal equipment

It consists of aluminium posts and 2.40m-high deep-treated northern pine panels with an extended panel on each side. Length: 4.03m. The size of the goal is 2.4m x 1.6m, equipped with a 3.96m x 1.6m non-reinforced net. The goal is topped with a 2.25m-high basketball assembly. Concepts are painted red (aluminium parts) and yellow (galvanised steel parts).

A Handball Basketgoal with extended panels

B 2.25m-high basketball assembly

Installing a Junior Handball Basketgoal

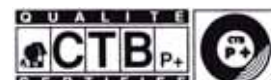

An Agorespace® Junior Handball Basketgoal is installed in 4 phases:

Platform: Determining the site, paving the platform, making the concrete stringers. **Supplying the material:** Unloading all of the material needed for the Agorespace® on site. **Concept assembly:** assembling and setting up the goal, the extended panels and the basketball assembly. Wedging and aligning the whole ready for fastening. **Finishes:** tarring the concrete foundations, fastening the nets on goals and basketball hoops.
